

BCS Protocol Timeline

*The role of the practitioner in this process is to submit case summaries and their respective medical records

¹Practitioner submits a series of 3 to 20 de-identified cases

²Protocol investigators confirm the eligibility of cases.

³Practitioner will then be notified which cases meet **all** eligibility criteria and will move forward to patient written consent to give contact information to protocol investigators

⁴CAM practitioner provides detailed medical history and are then notified whether each case is "persuasive" "supportive" or "unevaluable"

⁵Select cases are reviewed by cancer researchers with an expertise in the particular cancer

⁶The Best Case Series review results are summarized and shared with the submitting Practitioner
